Pollution Incident Management Plan

Revised by:

Craig Wallis (WHS, Regulatory & Training Manager)

Version

4

Annual Review due: 30 January 2022

AUTOP	AK	-VE	ΓLAB
GROU	PF	YTY	LTD

ACN 002 848 633

STANDARD OPERATING PROCEDURE

No 703/4 Issue Date 30/01/2020 Effective Date 05/02/2020

No of Attachments 7

TITLE Pollution Incident Management Plan

1. PURPOSE

To document a method whereby notifiable pollution incidents are documented and communicated to the relevant authorities and the community in accordance with Protection of the Environment Legislation Amendment Act 2011 (POELA Act)

2. SCOPE

This plan is applicable to EPA license

License No:	1035
Licensee:	Autopak- Vetlab Group Pty Limited
Facility Name:	Autopak- Vetlab Group Pty Limited
Location:	39 Harris Street, St Marys NSW

3. REFERENCES

- 3.1 Protection of the Environment Legislation Amendment Act 2011
- 3.2 SOP 201- Generation, treatment and disposal of aqueous waste and solid waste
- 3.3 SOP 604 Emergency action procedure.
- 3.4 SOP 701- Risk Management
- 3.5 WI 108 Control and testing of storm water in the detention pit
- 3.6 WI 217- Control of accidental spillage
- 3.7 WI 509 General emergency action general
- 3.8 WI 601- Pollution Incident Management

4. **DEFINITIONS**

4.1 Notifiable Pollution Incident - This is a pollution incident that escapes the site's boundaries into the air, water or soil e.g., into the storm-water system or gutters outside the site boundary.

TITLE Pollution Incident Management Plan

OR The contamination is confined to the site boundary AND costs \$10,000 or more to clean up.

- 5. PROCEDURE
- 5.1 Notification. Actions to be taken during or immediately after a pollution incident [clause 98C(1)(I)]
- (a) Notify the relevant authorities, tenants and neighbors
 In the event of a notifiable pollution incident being declared by the managing director, or his delegate, the receptionist, will alert the relevant authorities and neighbors in accordance with **Work Instruction** 601.
 - (b) In conjunction with local authorities, decide action to be taken.
 - (c) Update relevant authorities, tenants and neighbors as new information becomes available [clause 98C(1)(i)]

When instructed by the managing director or his delegate, the receptionist will contact neighbors and advise details of early warnings and updates. Records of the date and time called will be kept in accordance with **Work Instruction 601**

The community can obtain updates by telephoning the Public Community Lines on

- + 61 2 9673 2566
- 0418 416 097
- 0409312 879
 - (d) Follow- up with a report of the incident in writing to the EPA within one week of the incident.

Describe additional notification and any additional notification

- (e) Test the plan in accordance with WI 604 Testing the PI Management Plan
- (f) Availability of the Plan

The plan is to be made readily available to an authorized officer on request, and at the premises to which the relevant license relates, or where the relevant activity takes place, to any person who is responsible for implementing the plan.

TITLE Pollution Incident Management Plan

Only a portion of the plan is to be made publicly available within 14 days after it is prepared

In accordance with WI 601, upon written request from the community she will send free of charge copies of

- WI 601 Notification of a Pollution Incident to the Relevant Authorities
- Form: EPA Notification

She will also record the applicant's details in accordance with Work Instruction 601

5.2 Additional Notification to Relevant Authorities

Re-notify the above by telephone immediately additional information becomes available. This can be up to within 7days after the incident and before a written report is sent to the above. Inform the EPA in writing within 7 days with a detailed description of the incident and the subsequent action taken

5.3 Immediate Action to be taken after the pollution incident

For spills, cover the nearest storm water grate with a large plastic bag filled with water. Also ensue that the exit from the detention pit is closed. Cover the spill with sand, and then collect in drums for subsequent disposal. If the spill has entered the detention pit, it should be pumped into 1000L bulki-boxes for subsequent processing in the liquid waste treatment plant.

5.4 Keeping of Plan

A copy of the Plan and the site map is to be kept in the red information box near the front gate.

5.4.1 Testing, Maintaining and Updating the Plan

The dates on which the plan has been tested and the name of the person who carried out the test will be recorded in addition to the dates on which the plan is updated

Following a pollution incident, and at least once a year the plan is to be tested and maintained as described in WI 601

TITLE Pollution Incident Management Plan

5.5 Staff Training [clause 98C(1)(m)]

The nature and objectives of the training program in relation to the plan are described in Wi 217 Control of Accidental Spillage

5.6 Map of the premises and a map of the surrounding area [clause 98C(1)(k)]

A detailed map (or set of maps) showing the location of the premises to which the license relates, the surrounding area that is likely to be affected by a pollution incident, the location of potential pollutants on the premises and the location of any storm water drains on the premises is shown in **Attachments** 5 and 6.

5.7 HAZARDS

5.7.1 Description and likelihood of hazards to human health and the environment [clause 98C (1)(a) and (b)]

The hazards to human health or the environment associated with the company's activity to which the license relates fall into Dangerous Goods Classes 3, 5, 8, and 9 and are described below

a) Class 3 Flammable

- May irritate or burn skin and eyes.
- Runoff from fire control or dilution water may pollute waterways.
- Vapour may cause dizziness or drowsiness.

b) Class 6 Toxic

- Poisonous, may be fatal if inhaled, swallowed or absorbed through skin.
- Inhalation, ingestion or contact with the substance may cause severe injury or death.
- Effect of contact or inhalation may be delayed.
- Runoff from fire control or dilution water may be poisonous and/or corrosive and pollute waterways.

TITLE Pollution Incident Management Plan

c) Class 8 Corrosive

- Poisonous, may be fatal if inhaled, swallowed or absorbed through skin.
- Inhalation, ingestion or contact with the substance may cause severe injury or death.
- Contact with molten substance my cause severe burns.
- Runoff from fire control or dilution water may be poisonous and/or corrosive and pollute waterways.

d) Class 9 Environmentally Hazardous Substances

- Inhalation or contact with substance may be harmful.
- Runoff from fire control or dilution water may pollute waterways.

5.7.2 Likelihood of such hazards occurring

Unlikely to occur during normal handling. Conditions or events that could, or would, increase that likelihood, include spills, leaks, or fire. Refer Attachment 7 Risk Assessment of the site's hazards.

5.7.3 Action that will be taken to control these hazards

Pre-emptive action [clause 98C(1)(c)] to be taken to minimize or prevent any risk of harm to human health or the environment include:-

- -Early warnings
- -Updates
- -Actions to be taken during and after a pollution incident
- -Bunding production areas, tanks, and warehouses.
- Plastic bags filled with water to prevent entry of spilt liquids into storm water drains.
- 50, 000 litre sump to catch runoff.

TITLE Pollution Incident Management Plan

- Spill control procedure, WI 217 Control of accidental spillage
- Risk assessments of the sites hazards. These include the measures to control these risks and are shown in Attachment 7 Risk Assessment of the site's hazards.

5.7.4 Minimising harm to persons on the premises [clause 98C(1)(j)]

Any identified risk of harm to human health will be reduced, by control measures outlined in individual batch and pack sheets and **Attachment 7 Risk Assessment of the site's hazards**. In the event of a spill that is not reportable, **WI 217 Control of accidental spillage** will be followed.

Where applicable, staff are provided with training, PPE and access to MSDSs.

Pre-emptive actions to be taken include:-

- a) Actions described in section 5.7.3 above. .
- b) Safety equipment and infrastructure to minimize the risk to human health and the environment [clause 98C(1)(f)]

Safety equipment or other devices that are used to minimize the risks to human health or the environment, and to contain or control a pollution incident include:-

- -PPE including full face shield, dust mask, safety glasses, gloves safety shoes and overalls.
- -Equipment for confined space entry.

5.7.5 Inventory and maximum quantity and location of each potential pollutant [clause 98C(1)(d) and (e)]

Attachments 1-4 contain the Site Inventory and Maximum Quantity of Potential Pollutants on the premises or used in carrying out the relevant activity, as well as the maximum quantity of any pollutant that is likely to be stored or held at particular locations at or on the premises to which the license relates.

A copy is kept in the red fire box near the main gate
